

RS485 Detector with electrochemical sensor for carbon monoxide (CO). Developed exclusively for its use with EUROSODELCO and SIEMENS CC62P.

Carbon Monoxide (CO) is a poisonous, odourless and colourless gas produced by the incomplete combustion of fossil fuels (petrol, butane, propane, natural gas, kerosene, carbon and wood). It is very dangerous when inhaled, even in small quantities.

Some of the CO emission sources are fuel burners in a bad condition or wrongly installed, water heaters, chimneys, petrol vehicles, etc...

The detector has been specially designed for underground car parks, road tunnels, garages and, in general, for those installations where there is presence of carbon monoxide.

TECHNICAL CHARACTERISTICS

Technology	Microprocessor and electrochemical sensor with filter for SOx/NOx/H ₂ S
Voltage	From 9V to 15V DC
Consumption	8mA (stand-by) 15mA (alarm).
Measurement range	From 0 to 400 ppm
Resolution	±2 ppm
Reproductiveness	1% bottom of scale
Linearity	Linear in all the scale
Calibration gas	Precise mixture 200 ppm CO + N ₂ 150 ml / min
Sensor life expectancy	4 years in normal working conditions
Relative Humidity	From 15% to 90% (continuous) & from 0% to 99% (intermittent).
Atmospheric pressure	±10%.
Working temperature	From -15°C to +50°C
Time response	T90 < 40 s.
Cable entry	PG9 syntec cable gland IP67 self-blocking.
Communication	RS485 addressable (1 to 16).
Protection grade	IP65
Presentation	Sealed box Makrolon & ABS
Weight (gr) y Dimensions (mm)	325 / 120-150-63 (including sensor head & cable entry)
Height of installation	1,8 - 2 m from floor
Cobertura	200 m ² (recommended).

EURODETECTORS HAVE BEEN DESIGNED FOR EUROSODELCO,
THE DETECTION SYSTEM FOR TOXIC AND EXPLOSIVE GASES DESIGNED BY DURAN ELECTRONICA

AVAILABLE GASES
