# SIEMENS

# Thermal Reset Limit Thermostats

## RAK-TW.1..H RAK-TW.1..H..

Electromechanical TW according to DIN EN 14597

• 2-position thermal reset limit thermostat with single-pole changeover

Use	<ul> <li>a period interminal recent multiplication of the only period change of the intermination of the multiplication in the interminal recent multiplication in the multiplication in the multiplication of the multiplic</li></ul>				
Function	<ul> <li>Typical applications:</li> <li>Heat generation plant (supervision of the boiler temperature; mandatory in open heating systems)</li> <li>For general use in heating, ventilation and air conditioning plant</li> </ul>				
Changeover switch (S.P.D.T.)	When the adjusted switch-off temperature is reached on rising temperature, contact connection 1-2 changes over to contact connection 1-3. When the temperature of the medium falls by the value of the switching differential, the thermal reset limit thermostat (TW) reverts to contact connection 1-2. If the probe has cooled down to a temperature below approx20°C, the control current circuit opens, however, automatically closes again, when the temperature rises.				

### Type summary

Product No.	Stock number	Degree of	Temperature	Capillary	Scope of delivery	Pocket
		protection	setting range	tube length		length <sup>1)</sup>
RAK-TW.1000HB	S55700-P115	IP65	1595 °C		RAKB and P) / Clamping band for 100 r	100 mm
RAK-TW.1200HP	S55700-P118	IP65	40120 °C	-		100 mm
RAK-TW.1200B-H	S55700-P117	IP43	40120 °C	700 mm	max. pipe dia. 100 mm (for	100 mm
RAK-TW.1000S-H	S55700-P116	IP43	1595 °C	700 mm	RAKB) / Cable	
RAK-TW.1200S-H	S55700-P119	IP43	40120 °C		gland M16x1.5 mm / Mounting instructions	
	1) Pocket ALT-	SB100, brass	s nickel-plated, l	PN10		
Accessories	Refer to Data S	heets N1193	and N1194.			
Ordering	When ordering, (standard set).	When ordering, please give type reference according to "Type summary"				
	If the accessories required are not those included in the standard set, they can be ordered separately according to the type references given in Data Sheets N1193 and N1194.					
Mechanical design						
	<ul> <li>pocket or wall mounting; the electromechanical thermal reset limit thermostat uses a capillary type sensing element.</li> <li>The cover is made of PC and has a viewing window.</li> <li>The cable gland is M16x1.5 mm.</li> <li>The PC plastic is especially designed to be flame resistant, UV protected and flexible against high temperatures and tough against chemical and biological impacts.</li> </ul>
